

*SideKick*TM Indirect Water Heaters

Robust construction - Inner tank is precision built from high quality steel and repetitive pressure testing assures the highest quality.

Durable exterior - All steel construction with an environmentally-friendly powder coat finish providing a tough and attractive exterior.

C^oglass[®] - cobalt-enriched porcelain enamel glass lined tank and coil are highly resistant to aggressive water. Not susceptible to damage due to the presence of chloride in the water.

Automatic controls - immersion aquastat used in all models.

Factory installed brass drain valve - accessible, tamper-proof.

Sediment reduction inlet - on 80SK and 119SK models "swirls" incoming water to reduce sediment buildup.

Factory installed T&P relief valve - CSA listed and ASME rated.

1-1/2" coil diameter - large diameter, open-throat coil provides higher recovery and less pressure drop. Smooth glass surface on coil resists lime build up.

ecomate[®] insulation - Does not contribute to global warming

Two magnesium anode rods - inhibit corrosion and maximize tank life. Electrolysis attacks the anode rods, not the tank.

Factory installed dielectric nipples on boiler connections - provides greater insulating protection.

Limited Lifetime Warranty* on residential installations when registration form is returned to the manufacturer upon installation; **Seven-year warranty*** if not registered.

Commercial Installations: Three-Year Limited Warranty*

**Warranty coverage is as defined in the Installation and Operation Manual*

We take water heaters very personally!
